ABS PUBLICATIONS AND OTHER DISSEMINATION MEDIA

Current publications produced by the ABS are listed in the Catalogue of Publications and Products. Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

ABS National publications issued last month are listed at the back of this publication.

Publications dealing with individual States are produced by Deputy Commonwealth Statisticians in each State while publications dealing with the Northern Territory and the Australian Capital Territory are produced by the Statisticians of these Territories.

For further information about ABS statistics and services please contact any of the ABS offices (see back of this publication).

SYMBOLS AND OTHER USAGES

The following is an explanation of the symbols used in this publication:

- n.a. not available
- n.e.c. not elsewhere classified
- n.e.s. not elsewhere stated
- n.y.a. not yet available
 - .. not applicable
- n.p. not available for publication unless otherwise indicated but included in totals where applicable
 - p preliminary figure or series may be subject to revision
 - r figures or series revised since previous issue
 - nil or rounded to zero
- break in continuity of series (where drawn across a column between two consecutive figures)
 - * subject to sampling variability too high for most practical purposes.

Yearly periods shown as, e.g. 1992, refer to the year ended 31 December 1992, those shown as, e.g. 1991-92, refer to the year ended 30 June 1992.

Values are shown in Australian dollars (\$).

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Also, minor revisions to figures already published are not applied for periods more than one quarter prior to the quarter of publication. Hence, small discrepancies may occur between annual data and totals derived by summing the data for each of the four quarters.

Most of the original and all of the seasonally adjusted series are subject to revision.

ADJUSTMENT TO SERIES

In the Contents page, tables of series containing seasonally adjusted indicators are marked with a dagger (†).

As well as being adjusted for normal seasonal factors, some of the statistical series included in the *Monthly Summary* of Statistics, Australia, have been adjusted for the effects of calendar variations: namely, 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, e.g. Easter and Australia Day.

Trend estimates are shown for some series in which the seasonally adjusted series have been smoothed to reduce the impact of the irregular component.

⁽a) Prior to September 1991 disputes affecting more than one industry and/or State have been counted as separate disputes in each industry and State and in the Australian total. From that time such disputes, while still counted separately in each industry and/or State, are counted just once at the broader industry and Australia level. (b) Comprises workers involved in disputes which commenced during the month and additional workers involved in disputes which continued from the previous month.

⁽a) Includes natural gas. (b) Total electricity generated by establishments predominantly engaged in the generation of electricity. (c) Includes ingots, puddled bars, pilings, blocks or lumps and steel in molten state. There is a break in the series as statistics after July 1991 exclude a small proportion of total production, due to the withdrawal of consent for the ABS to release the information. (d) From rolling and forging of iron and steel (primary mills output). (e) For structural purposes. (f) Source: ABARE. Quarterly figures are expressed in terms of green off sawn volumes.

PRIVATE NEW CAPITAL EXPENDITURE BY SELECTED INDUSTRIES AND TYPE OF ASSET, AUSTRALIA (\$ million)

These statistics are designed primarily to measure trends in expenditure by private enterprises, on new fixed tangible assets. The statistics in this table differ somewhat from the item Gross fixed capital expenditure in the table on page 29 of this publication as a result of the different methods of compilation of the two sets of statistics.

(a) All figures are \$A values at end of period shown. Changes in the \$A value of holdings of official reserve assets in any period reflect both valuation effects and transactions. The latter include sales and purchases (including swaps) of, and earnings on, foreign exchange by the RBA and certain transactions with official institutions overseas. The foreign currency value of overseas assets is based, where applicable, on market quotations; accrued interest is normally taken into account. Conversion into \$A equivalent is based on end-month rates of exchange. (b) Gold is valued at the \$A equivalent of the 3 p.m. price fix in the London gold market on the last business day of the month. See also table on Official Reserve Assets and Exchange Rates in the Balance of Payments section, page 40.

Figures prior to January 1989 exclude Commonwealth Development Bank and Australian Resources Development Bank. The table shows from January 1990 liabilities and assets recorded on banks' Australian books; prior to this date, it shows liabilities and assets within Australia. (b) All certificates of deposits issued by banks have been shown as resident deposits. (c) Includes issues of term subordinated debt, loan capital and similar instruments. Not separately available before January 1990. (d) Prior to January 1989, includes in "All other \$A liabilities". (e) Excludes shareholders' funds. (f) Break in series due to establishment of new bank(s), which may have caused the switching of assets and liabilities from NBFIs to banks. (g) Break in series associated with the integration of a accounting procedures by a bank. (j) The Statutory Reserve Deposit ratio for trading banks was set at zero on 27 September 1988 and balances transferred to non-callat accounts. On 12 October 1988, stand-alone savings banks made their first deposits under arrangements for all banks to hold non-callable deposits with the Reserve Bank. (k) Prior to January 1989, included in "All other \$A assets". (l) Prior to January 1989, excludes non-resident foreign currency assets.

(a) Includes Government-owned vehicles except those belonging to the defence services. Excludes plant and equipment, caravans and trailers. (b) Data from December 1990 in this table is based on the System of Vehicle Identification Numbers (VIN) introduced by motor vehicles authorities from July 1990 onwards. The system allows more accurate identification and classification of newly registered vehicles and as a result there is a reduction in the level of new vehicle registrations, through better identification of duplicate registrations and those registered previously.

⁽a) From September quarter 1992, caravan park sites etc. permanently reserved but only causally occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Occupancy measures from September quarter 1992 are not therefore comparable with those from previous quarters.
